Designed to Save Resources

ecoLine Geotextiles - Perfect match of sustainability and durability

 **HUESKER**
Ideen. Ingenieure. Innovationen.

More sustainable construction with the **ecoLine**

Product solutions made of high-quality PET recycling material

Protecting the resources of our planet

With the ecoLine we are the first geotextile manufacturer in the world to offer you high-quality reinforcement solutions made of PET recycling material. Thanks to this innovation, we are making our contribution to a better recycling economy and even more sustainable construction with geotextiles.

The ecoLine product solutions are characterised by their high quality and have the same performance characteristics as the original products. The recycled yarns used by us have proven original fibre quality. Sustainability and durability are perfectly combined.

Making your projects even more eco-friendly

We would be delighted if we could work together in the future to make your projects even more resource-saving and environment friendly.

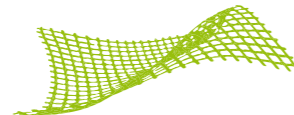

We would also be pleased to create individual product solutions for you. Further information on the ecoLine and the product solutions is available on our website or also in a personal conversation under **+ 49 (0) 25 42 / 701 - 0**.

100 % original fibre quality from 100 % recycled PET

A world first for more sustainable construction with geotextiles

HUESKER product classics made from recycled materials

Less CO₂ emissions thanks to the reduction of primary raw materials

Saving resources thanks to production with recycled PET bottles

PET recycled yarns with proven original fibre quality

Highest geotextile quality „Made in Germany“

HaTelit® C **eco LINE**

The flexible geogrid for effective and long-lasting reinforcement of asphalt layers is one of our ecoLine product solutions.

The sustainable version of our product classic HaTelit C 40/17

Same performance values and features as the original

Produced with PET recycling yarn, can be reused in the milled mix during dismantling

Extends the service life of traffic areas
